

.novadiff-graph/config.json

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T11:03:07.813Z

Overview

A new file, `.novadiff-graph/config.json`, has been added to the repository.

The file contains four lines: `{ "autoUpdate": false, "outputLanguage": "en" }`

- **File addition**: `.novadiff-graph/config.json` now exists (previously absent).
- **Configuration defaults**: The file sets `"autoUpdate": false` and `"outputLanguage": "en"`.

Impact

- **Scope**: The change is limited to the new configuration file; no other files were modified.
- **Usage**: It is unknown from the diff whether any component currently reads this file.
- **Future maintenance**: Centralizing these flags may simplify future adjustments, but code that previously assumed no config file may need to handle its presence.

Risks & follow-ups

- **Configuration loading**: Unknown from the available evidence whether the graph module loads this file; verify that the loader is invoked during initialization.
- **Flag enforcement**: Run targeted tests to confirm that `autoUpdate` is respected if the config is read.
- **Documentation**: Update any relevant docs to reflect the new configuration options once their usage is confirmed.
