

## **.novadiff-graph/diff-overlay.json**

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T21:08:15.075Z

### **Overview**

A new JSON artifact, `.novadiff-graph/diff-overlay.json`, has been added. It contains metadata and a list of changed files from the latest diff.

### **Key changes**

- File creation: lines 1-1139 add `{` to start the JSON object.
- Metadata: lines 2-4 add `"version":"1.0.0"`, `"baseBranch":"novadiff-compare"`, and `"generatedAt":"2026-05-19T20:52:49.663Z"`.
- Changed files: lines 5-6 add `"changedFiles": [ ".gitignore" ]`.
- No executable logic is present; the file is purely data.

### **Impact**

- The artifact supplies data that can be consumed by the UI overlay component.
- No code paths or runtime behavior are altered by this change.

### **Risks & follow-ups**

- The `"changedFiles"` array currently contains only `.gitignore`; future diffs should populate it with all changed files.
- Verify that the UI correctly parses the JSON and displays the list of changed files.
- Ensure the `"version"` field remains compatible with the NovaDiff schema.
