

electron/github-service.cjs

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T21:14:23.488Z

Overview

A new CommonJS module `electron/github-service.cjs` (lines 1-224) wraps the GitHub CLI (`gh`). It exposes helper functions for authentication status, repository and PR listing, PR creation, and account detection.

Key changes

- **Imports** – added `spawnSync` from `node:child_process` (R3), `parseGithubSlugFromUrl` from `./git-service.cjs` (R4), and `augmentPathForCli`, `resolveGhExecutable`, `ghNotFoundError` from `./gh-path.cjs` (R9).
- **Command execution** – `runGh` (lines 11-27) runs `gh` synchronously with a timeout; `tryRunGh` (lines 30-36) wraps it in a try/catch.
- **Auth helpers** – `getAuthStatus` (lines 43-74) checks `gh auth status`; `getUserProfile` (lines 163-176) fetches the authenticated user via `gh api user`; `listDetectedAccounts` (lines 179-200) returns the profile or a fallback.
- **Repository/PR utilities** – `listRepos` (lines 77-95), `listPullRequests` (lines 98-126), `viewPullRequest` (lines 129-139), and `createPullRequest` (lines 142-160) invoke `gh` commands and parse JSON.
- **Slug extraction** – `slugFromRepoRoot` (lines 203-210) parses remote URLs to derive owner/repo and remote name.
- **Exports** – all public functions are exported via `module.exports` (lines 213-224).

Impact

- Requires the `gh` CLI; missing executables trigger `ghNotFoundError`.
- Uses `spawnSync`, so long `gh` operations block the event loop.
- Errors from `gh` are surfaced as JavaScript `Error` objects, enabling consistent handling in the Electron app.

Risks & follow-ups

- **Missing `gh`** – confirm graceful handling of `ghNotFoundError` and user guidance.
- **Performance** – monitor blocking behavior when listing many repos or PRs; consider async alternatives if needed.
- **API changes** – `gh` output format may change; ensure JSON parsing remains robust.
- **Security** – `createPullRequest` builds command arguments from user input; verify proper sanitization to avoid injection.
