

package.json

Kind: modified · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T21:04:04.221Z

Overview

The root `package.json` now declares a monorepo with two workspaces: `packages/graph-core` and `packages/graph-view` (added in lines 7-10). Build and dev scripts delegate to these workspaces, and the Electron build config references the workspace outputs.

Key changes

- **Workspaces:** `"workspaces": ["packages/graph-core", "packages/graph-view"]` (R7-R10).
- **Scripts:** old `electron:dev` and `build` removed (L10-L11). New workspace-aware scripts added: `graph:core-build`, `graph:catalog:generate`, `graph:build`, and a new `electron:dev` that runs `graph:build` before the Electron dev server (R14-R18).
- **Dependencies:** local package references added: `"@novadiff/graph-core": "file:packages/graph-core"` and `"@novadiff/graph-view": "file:packages/graph-view"` (R24-R26). `three` restored to dependencies (R26 removed, R43-R44 added).
- **DevDependencies:** `tailwindcss` added (R58).
- **Electron build:** `files` array expanded to include `packages/graph-core/dist/**/*` and `packages/graph-core/package.json` (R74-R75). The exclusion `node_modules/marked/**/*` removed and replaced by a blanket `node_modules/**/*` (L55 removed, R78 added).
- **extraResources:** new block pointing to `cli/target/release` (R81-R86).
- **Targets:** mac, win, linux targets set to `nsis` and `AppImage` (R90-R98).

Impact

- Workspace scripts must resolve correctly; failures will break Electron dev/build.
- The broader `node_modules/**/*` inclusion may increase bundle size; verify packaging.
- Local package references (`file:`) require `npm ci` to resolve properly.

Risks & follow-ups

- Run `npm run graph:core-build` and `npm run graph:build` locally before building Electron.
- Verify `npm ci` in root and each workspace resolves `file:` dependencies.
- Test Electron builds on macOS, Windows, and Linux to confirm `extraResources` and target settings.
- Check that the new `node_modules/**/*` inclusion does not package unnecessary files.
