

packages/graph-core/scripts/language-names.txt

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T19:23:35.246Z

Overview

A new file `packages/graph-core/scripts/language-names.txt` has been added.

The diff shows 675 added lines (R1-675). The first entry is **"A.NET (A#/A sharp)"** and the last is **"ZPL"**.

Key changes

- **File addition:** `packages/graph-core/scripts/language-names.txt` now exists in the `graph-core` package.
- **Content:** The file contains a plain-text list of 675 programming-language names, alphabetically ordered.
- **No other code changes:** The diff contains only the new file; no imports, exports, or references to it appear in the changed files.

Impact

- **Build:** The file is static; adding it does not alter compilation or runtime unless another module explicitly reads it.
- **Documentation:** The list can be consumed by future tooling or docs generators that need a reference of language names.
- **Size:** Approximately 10 KB; negligible effect on repository size or network transfer.
- **Testing:** No tests were added or modified; existing tests remain unchanged.

Risks & follow-ups

- **Unintended consumption:** If a future module imports this file, it will introduce a hard dependency on a large static list. No evidence of such imports in the current diff.
- **Maintenance:** The list is static; consider a script to keep it updated if ongoing coverage is required.
- **Documentation consistency:** Verify that any documentation referring to supported languages includes this new list to avoid discrepancies.
