

packages/graph-core/src/languages/alphabetical-catalog.generated.ts

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T20:39:09.925Z

Overview

- New file `packages/graph-core/src/languages/alphabetical-catalog.generated.ts` added (R1-673).
- Auto-generated by `scripts/generate-alphabetical-catalog.mjs` ; header comment marks it as non-editable (R4).
- Exports `alphabeticalCatalogEntries: LanguageCatalogEntry[]` (R5) after importing the type from `./catalog-types.js` (R2).
- Contains 667 `LanguageCatalogEntry` objects sorted alphabetically by `displayName` (R4).

Key changes

- File addition: `alphabetical-catalog.generated.ts` (R1).
- Import: `import type { LanguageCatalogEntry } from "./catalog-types.js";` (R2).
- Export: `export const alphabeticalCatalogEntries: LanguageCatalogEntry[] = [` (R5).
- New entries:
 - `{ id: "ql", displayName: ".QL", extensions: [] }` (R6).
 - `{ id: "formula", displayName: "@Formula", extensions: [] }` (R7).

Impact

- Runtime catalog of 667 languages is now available for language-catalog consumers.
- Two new language entries (`.QL` and `@Formula`) are included with empty extensions.

Risks & follow-ups

- Bundle size may increase due to the large array; monitor production builds.
- Ensure `scripts/generate-alphabetical-catalog.mjs` stays in sync to regenerate the file when language data changes.
- Add tests to verify presence and ordering of the new entries.
