

packages/graph-core/src/languages/index.ts

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T20:41:18.064Z

Overview

A new file `packages/graph-core/src/languages/index.ts` (lines R1-R27) has been added. It re-exports language-related types, schemas, registries, and built-in configurations.

Key changes

- **Type re-exports** (R2-R6): `LanguageConfig`, `TreeSitterConfig`, `FilePatternConfig`, `FrameworkConfig` from `./types.js`.
- **Schema re-exports** (R9-R14): `LanguageConfigSchema`, `TreeSitterConfigSchema`, `FilePatternConfigSchema`, `FrameworkConfigSchema` from `./types.js`.
- **Registry exports** (R17-R18): `LanguageRegistry` from `./language-registry.js`, `FrameworkRegistry` from `./framework-registry.js`.
- **Built-in language configs** (R21-R25): `builtinLanguageConfigs`, `detailedLanguageConfigs`, `listAlphabeticalLanguages` from `./configs/index.js`.
- **Built-in framework configs** (R26): `builtinFrameworkConfigs` from `./frameworks/index.js`.
- **Catalog type export** (R27): `LanguageCatalogEntry` from `./catalog-types.js`.

Impact

- Consumers can import these symbols directly from `graph-core/languages`.
- No breaking changes; only new exports are added.
- The file contains only re-exports, so runtime impact is none.

Risks & follow-ups

- **Import regressions:** unknown from the available diff/scan evidence. Verify that existing modules still resolve symbols after the change.
- **Duplicate symbol names:** unknown from the available diff/scan evidence. Ensure no naming collisions with other modules.
- **Build inclusion:** unknown from the available diff/scan evidence. Confirm the file is compiled and bundled correctly.
- **Linting & tests:** run `npm run lint`, `npm test`, and `npm run build` to catch any subtle type or import errors.
