

packages/graph-view/src/components/ExportMenu.tsx

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T20:21:48.080Z

Overview

A new `ExportMenu` component is added at `packages/graph-view/src/components/ExportMenu.tsx`. It renders a button that toggles a dropdown with options to export the current graph as PNG, SVG, or JSON.

Key changes

- **Imports** (lines 1-5):
 - `useEffect`, `useRef` from `React`.
 - `useDashboardStore` from `../store`.
 - `useI18n` from `../contexts/I18nContext`.
 - `KnowledgeGraph` type from `@novadiff/graph-core/types`.
 - `filterNodes`, `filterEdges` from `../utils/filters`.
- **Utility functions** (lines 7-20):
 - `escapeXml` sanitizes node labels.
 - `downloadBlob` triggers a file download.
- **Component state** (lines 22-30): pulls `graph`, `nodeIdToLayerIds`, `filters`, `exportMenuOpen`, `toggleExportMenu`, `reactFlowInstance`, and `persona` from the dashboard store.
- **Outside-click handling** (lines 35-45): a `mousedown` listener closes the menu when clicking outside the container.
- **SVG generation** (lines 47-102): `buildCleanSvg` computes bounds, draws edges and nodes, and returns SVG markup with dimensions.
- **Export actions** (lines 104-216):
 - `exportPNG` renders the SVG to a canvas, converts it to a PNG blob, and downloads it.
 - `exportSVG` downloads the raw SVG blob.
 - `exportJSON` filters the graph by persona and filters, serializes it to JSON, and downloads it.
- **UI** (lines 218-279): a button toggles the menu; each menu item calls the corresponding export function.

Impact

The component adds a user-visible export feature to the graph view, enabling users to save visual or data representations of the graph.

Risks & follow-ups

- No tests or lint failures are reported in the diff; potential runtime errors (e.g., missing `reactFlowInstance`) are handled with alerts, but edge-case coverage is unknown from the

available evidence.

- Future work could add unit tests for the export logic and verify that the generated files match expected schemas.
