

packages/graph-view/src/main.tsx

Kind: added · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T19:35:54.917Z

Overview

A new entry point `packages/graph-view/src/main.tsx` has been added to bootstrap the Graph View React application.

Key changes

- **Imports added** (lines 1-4):

```
``ts import { StrictMode } from "react"; import { createRoot } from "react-dom/client"; import "./index.css"; import App from "./App";
```

– ****Root rendering**** (lines 6-10):

```
ts createRoot(document.getElementById("root")!).render( );
```

Impact

- The app mounts to the DOM element with id `root`. If that element is missing, rendering will fail.
- Bootstrap logic is centralized, simplifying future updates.
- Uses React 18's `createRoot`, enabling concurrent rendering.

Risks & follow-ups

- Verify that the target HTML contains `

- Ensure the new `main.tsx` is referenced in the build entry points (e.g., `tsconfig.json`, `vite`/`webpack` config).
- Confirm that `index.css` exists; missing CSS may affect styling.
- `createRoot` requires React 18+; check that the project's dependencies satisfy this requirement.
