

src/components/SidebarNav.tsx

Kind: modified · Baseline: 8e0dc031dcfc · Target: NovaDiff · Generated: 2026-05-19T19:16:45.433Z

Overview

`SidebarNav.tsx` was refactored to add a richer workspace experience.

Key additions include a local-only mode flag, expanded navigation targets, and a conditional brand-reveal animation.

Key changes

- **Imports** – `useLaunch` and `TypewriterText` added at lines 2-3.
- **Props** – `SidebarNavProps` now contains `localOnlyMode?`, `gitUser?`, `workspaceName?`, and `workspaceRepoLabel?` (lines 26-29).
- **WorkspacePage** – type expanded to `"compare" | "history" | "docs" | "prs" | "publish"` (line 18).
- **Brand reveal** – `useLaunch` drives `showLaunchBrand`; when true, a typewriter animation renders the brand (lines 47-50, 56-77).
- **Navigation** – new buttons for `"history"`, `"prs"`, and `"publish"` added with Git-locked logic; placeholder "Coming soon" buttons removed (lines 149-156, 171-179).
- **User section** – avatar now renders `gitUser.avatarUrl` if present, otherwise a fallback icon; name/email logic respects `localOnlyMode` (lines 210-233).
- **Removed** – static brand title, tagline, product line (lines 41-44), placeholder buttons (lines 119-120, 123-124, 127-128), and static avatar (lines 146-148).

Impact

- Callers must supply the new props or accept `undefined`; the expanded `WorkspacePage` may break type checks if not updated.
- The brand animation mounts only when `showLaunchBrand` is true, adding negligible runtime cost.
- Git-dependent navigation items are disabled when `localOnlyMode` is true, preventing accidental use of unavailable features.

Risks & follow-ups

- Verify that `useLaunch` correctly sets `brandReveal` and `skipSequence`; otherwise the brand will not appear.
- Ensure `onWorkspacePage` handles the new `"history"`, `"prs"`, and `"publish"` values to avoid navigation failures.
- Confirm that `gitLocked` logic correctly disables Git-dependent buttons when `localOnlyMode` is true.
- Run unit tests for components consuming `SidebarNav` to catch any missing prop errors.
