

.novadiff-graph/diff-overlay.json

Kind: modified · Baseline: 984f0748954a · Target: NovaDiff · Generated: 2026-05-27T05:50:22.095Z

Overview

The `diff-overlay.json` file was updated: the `generatedAt` timestamp changed from `2026-05-26T07:21:38.024Z` to `2026-05-27T04:48:24.800Z` (L4).

The `changedFiles` array was trimmed to only four entries:

- `.novadiff-graph/diff-overlay.json` (L5)
- `.novadiff-graph/knowledge-graph.json` (L6)
- `.novadiff-graph/meta.json` (L7)
- `src/App.css` (L27)

All other file paths were removed.

The `changedNodeIds` array was cleared (L28).

Key changes

- Timestamp update – `generatedAt` changed (L4).
- `changedFiles` now contains only the four files listed above (L5-L8, L27).
- `changedNodeIds` is an empty array (L28).

Impact

- Downstream consumers will no longer receive change notifications for the removed files; if those files are required, updates will be missed.
- The JSON payload is smaller, reducing parsing and transmission overhead.
- Tools that previously expected the larger `changedFiles` list may need to be updated.

Risks & follow-ups

- Verify that UI diff viewers and CI checks still function with the reduced file list.
- Confirm that clearing `changedNodeIds` was intentional; run a smoke test to ensure no node-level changes are omitted.
- Ensure the new `generatedAt` value is produced by the build pipeline, not hard-coded.
