

.novadiff-graph/meta.json

Kind: modified · Baseline: 46a8da0664d1 · Target: NovaDiff · Generated: 2026-05-19T22:35:36.762Z

Overview

The `.novadiff-graph/meta.json` file was updated. The changes are in lines L2-3 and L5 of the original file, replaced by new values in the same positions.

Key changes

- `lastAnalyzedAt` : 2026-05-19T20:52:49.662Z → 2026-05-19T22:32:24.542Z (L2 removed, R2 added)
- `gitCommitHash` : 8e0dc031dcfc62a38f560a90bc881a8fd6655a51 → 46a8da0664d1dce2715e93ec6698cf67012b963f (L3 removed, R3 added)
- `analyzedFiles` : 324 → 329 (L5 removed, R5 added)

No other fields were modified.

Impact

- **Accuracy** – metadata now reflects the latest analysis run.
- **Observability** – consumers of `meta.json` will see the updated timestamp and commit hash, aiding audit trails.
- **Compatibility** – the JSON schema is unchanged; existing parsers continue to work.
- **Maintainability** – the change is confined to a single file, minimizing downstream impact.

Risks & follow-ups

- **Test failures** – any tests asserting the old values will fail; run the targeted test suite and adjust expectations.
- **Hard-coded assumptions** – verify downstream services do not rely on the previous commit hash or file count.
- **Parsing** – ensure all consumers correctly parse the new ISO timestamp.
- **Documentation** – update any docs that reference the old metadata values.
