

src/components/InsightsColumn.tsx

Kind: modified · Baseline: NovaDiff-main · Target: NovaDiff · Generated: 2026-05-14T06:54:39.871Z

Overview

This is a folder diff between two trees on disk, with a focus on the `src/components/InsightsColumn.tsx` file. The change kind is modified, indicating that both sides exist but differ. The line changes are approximately +115/-12.

Key changes

- Added imports for `isNovadiffDocsReservedPath`, `Check`, `LayoutList`, `Loader2`, and `Sparkles` from `lucide-react`.
- Added types for `FileChange`, `FileDiffPayload`, `LlmSettings`, and `InsightsColumnProps`.
- Modified the `InsightsColumn` function to include new props and changed import statements.
- Added a new section for generating summaries and displaying evidence anchors.

Impact

- This change adds new functionality for generating summaries and displaying evidence anchors, which may impact performance or compatibility with certain models.
- The added imports and types may introduce regression risk if not properly tested or documented.

Risks & follow-ups

- Verify that the new summary generation and display features work correctly with different models and input data.
- Ensure that the new types and imports are properly tested and documented to avoid future regressions.
