

## **.novadiff-graph/meta.json**

Kind: modified · Baseline: 9aadd5eb5604 · Target: NovaDiff · Generated: 2026-05-26T19:14:40.347Z

### **Overview**

The file `.novadiff-graph/meta.json` was modified.

- Line 2: `lastAnalyzedAt` was updated.
- Line 5: `analyzedFiles` was updated.

### **Key changes**

- `lastAnalyzedAt` changed from `2026-05-26T01:49:38.223Z` to `2026-05-26T07:21:38.024Z` (diff: L2 → R2).
- `analyzedFiles` increased from `352` to `373` (diff: L5 → R5).
- No other fields were altered.

### **Impact**

- Any code that reads this JSON will now see the new timestamp and file count.
- If consumers cache based on `lastAnalyzedAt`, earlier caches may be invalidated.
- The JSON schema remains unchanged; existing parsers should continue to work.

### **Risks & follow-ups**

- Verify that components expecting the previous timestamp or file count do not fail.
- Run unit tests that assert the values of `lastAnalyzedAt` and `analyzedFiles`.
- Perform a manual smoke test: run an analysis and confirm the file count matches the actual number of processed files.
- Update documentation that hard-codes the old values, if any.
