

src/components/launch/TypewriterText.tsx

Kind: modified · Baseline: 9aadd5eb5604 · Target: NovaDiff · Generated: 2026-05-26T19:42:29.897Z

Overview

`src/components/launch/TypewriterText.tsx` now accepts a `direction` prop (`"forward" | "reverse"`) and removes legacy state/refs that tracked completion and activity. The component's initial visible count and effect logic are simplified and guarded against stale closures.

Key changes

- **New export:** `export type TypewriterDirection = "forward" | "reverse";` added at line 4.
- **Prop addition:** `direction?: TypewriterDirection` with default `"forward"` (lines 24-25).
- **Initial state:** `useState(direction === "reverse" ? text.length : 0)` replaces the old `visible = 0` (line 32).
- **Removed refs:** `completedRef`, `wasActiveRef`, and related logic (lines 30-43).
- **Run-id guard:** `const runIdRef = useRef(0)` and `runId` counter prevent race conditions (lines 47-50).
- **Effect dependencies** updated to include `direction` (line 104).
- **Done calculation** now respects direction (lines 106-108).
- **Cursor rendering** unchanged but uses the updated `done` logic (lines 114-116).

Impact

- **Behavior:** Forward and reverse typing are now supported via the `direction` prop.
- **Maintainability:** Fewer refs and a single effect reduce complexity.
- **Performance:** Eliminates unnecessary state updates and cleanup logic; run-id guard avoids stale closures.
- **Compatibility:** Adding `direction` is backward-compatible (default `"forward"`); existing props remain unchanged.
- **Observability:** Simplified effect makes debugging easier; run-id counter provides clear cancellation semantics.

Risks & follow-ups

- **Persist handling:** Verify that text remains visible after completion when `persist` is true for both directions.
- **Cursor visibility:** Ensure cursor still hides correctly when typing finishes or when reduced motion is enabled.
- **External consumers:** Check that importing the new `TypewriterDirection` type does not break existing code.
- **Test coverage:** Add tests for reverse direction and for the run-id guard to confirm no race conditions.
