

## `.novadiff-graph/meta.json`

Kind: removed · Baseline: f7c2bfd81af2 · Target: NovaDiff · Generated: 2026-05-21T10:41:14.448Z

### Overview

The file `.novadiff-graph/meta.json` was removed from the repository.

All six lines of JSON content— `lastAnalyzedAt` , `gitCommitHash` , `version` , and `analyzedFiles` — were deleted (lines 1–6 in the diff).

### Key changes

- **File deletion:** `.novadiff-graph/meta.json` no longer exists in the tree.
- **Metadata loss:** The six lines of JSON that tracked analysis timestamp, commit hash, version, and file count are gone.
- **No other source changes:** The diff shows only the removal of this file.

### Impact

- **Runtime behavior:** Any code that attempts to read `.novadiff-graph/meta.json` will now encounter a missing-file error unless it handles the absence.
- **Build artifacts:** The build pipeline no longer generates or consumes this metadata file.
- **Documentation:** References to the metadata file in docs or comments should be updated to avoid confusion.

### Risks & follow-ups

- **Reference breakage:** Search the codebase for `meta.json` or `analyzedFiles` ; failing to update them could cause crashes.
- **Test coverage:** Run the nearest targeted tests (e.g., analysis pipeline tests) and a quick manual smoke test to confirm no runtime errors.
- **CI pipeline:** Verify that any CI steps that previously relied on the metadata file (e.g., publishing version info) are updated.
- **Documentation audit:** Remove or revise any README or internal docs mentioning the metadata file.
