

.novadiff-graph/config.json

Kind: added · Baseline: a9c34bfb03fe · Target: NovaDiff · Generated: 2026-05-20T04:15:25.949Z

Overview

A new file `.novadiff-graph/config.json` has been added. It contains a minimal JSON object with two properties.

Key changes

- File addition: `.novadiff-graph/config.json` (lines R1-R4 added).
- `autoUpdate` : set to `false` (line R2).
- `outputLanguage` : set to `"en"` (line R3).
- JSON structure: `{ "autoUpdate": false, "outputLanguage": "en" }` (lines R1-R4).

Impact

- The presence of this file may affect components that load configuration from this path.
- The default values are explicitly defined; previously implicit defaults may no longer apply.
- Unknown from the available diff/scan evidence whether any runtime behavior changes.

Risks & follow-ups

- Verify that consumers of this config handle the `false` value for `autoUpdate` .
- Ensure older deployments that did not ship this file still function, or provide a fallback.
- Update documentation to list the new config file and its purpose.
- Run targeted tests that load the config and confirm the default language is `"en"` .
