

THIRD_PARTY_NOTICES.md

Kind: added · Baseline: a9c34bfb03fe · Target: NovaDiff · Generated: 2026-05-20T04:07:35.809Z

Overview

A new documentation file `THIRD_PARTY_NOTICES.md` was added to the repository root. The file begins with `# Third-party notices` (added line 1) and includes a paragraph describing the MIT-licensed components used by NovaDiff's knowledge-graph engine (added line 3). The paragraph references `packages/graph-core` and `packages/graph-view` and notes that they incorporate Tree-sitter parsing and grammar handling libraries.

Key changes

- **File addition:** `THIRD_PARTY_NOTICES.md` (root).
- **Header:** `# Third-party notices` (line 1).
- **Content:** Mentions MIT-licensed components for Tree-sitter parsing in `packages/graph-core` and `packages/graph-view` (line 3).
- **No source code changes:** Only documentation was added.

Impact

- **Compliance:** Provides a record of third-party licenses for the mentioned components.
- **Documentation:** Adds transparency about external dependencies.
- **Build/packaging:** No effect on build or runtime; the file is informational.

Risks & follow-ups

- **Incomplete coverage:** The notice only lists Tree-sitter components; other dependencies may be missing.
- **Future updates:** Add new dependencies to this file as they appear.
- **Discoverability:** Ensure the file is referenced in project documentation so users can find it.
