

packages/graph-view/src/locales/ja.ts

Kind: added · Baseline: a9c34bfb03fe · Target: NovaDiff · Generated: 2026-05-20T05:35:39.969Z

Overview

A new file `packages/graph-view/src/locales/ja.ts` was added. It defines a `ja` object containing translated UI strings for the graph-view module, with nested sections such as `common`, ``project`

Overview

`, nodeInfo`, etc. The file ends with `export default ja;``.

Key changes

- File addition: `packages/graph-view/src/locales/ja.ts` (lines 1-272).
- Export: `export default ja;` at line 272.
- No modifications to existing files.

Impact

- Provides Japanese translations for all UI components that consume the `ja` locale.
- Centralizes Japanese strings, simplifying future updates.
- No breaking changes to existing code paths.

Risks & follow-ups

- **Import:** It is unknown from the diff whether the i18n loader imports this file; verify that `ja` is registered.
- **Key coverage:** Unknown if every UI string used in the app has a corresponding key in `ja`.
- **Build inclusion:** Unknown if the new file is included in the production bundle; check the build configuration.
- **Test coverage:** No evidence of tests referencing the new locale; consider adding tests for Japanese rendering.
