

src/components/SelectedDiffSummaryModal.tsx

Kind: added · Baseline: a9c34bfb03fe · Target: NovaDiff · Generated: 2026-05-20T05:00:04.096Z

Overview

A new component `SelectedDiffSummaryModal` is added in `src/components/SelectedDiffSummaryModal.tsx`. It renders a modal overlay that displays a summary of selected lines, a loading indicator, and error messages.

Key changes

- **Imports** (lines 1-3):

```
``ts import { X } from "lucide-react"; import { LlmSummaryMarkdown } from "../LlmSummaryMarkdown"; import { AnimatedOverlay } from "../ui/AnimatedOverlay";
```
- **Props interface** (lines 5-12):

```
ts export interface SelectedDiffSummaryModalProps { open: boolean; label: string | null; summary: string | null; loading: boolean; error: string | null; onClose: () => void; }
```

```
– UI structure: uses `AnimatedOverlay` with `backdropClassName="summary-modal-backdrop"` and `panelClassName="summary-modal"`. The header contains a close button (`<X size={18} aria-hidden />`) and an optional label. The body conditionally shows:

- a spinner when `loading && !summary?.trim()`;
- the summary via `- a caret (`|`) when `loading && summary?.trim()`.

```

Impact

- The modal explicitly handles open, loading, error, and summary states, centralizing the logic for this UI element.
- Conditional rendering avoids rendering unnecessary DOM nodes during loading or error states.
- No existing components are modified; only new imports and CSS class names (`summary-modal-\*`) are introduced.

Risks & follow-ups

- **Dependencies**: `lucide-react`, `LlmSummaryMarkdown`, and `AnimatedOverlay` must be installed and exported correctly.
- **Styles**: CSS classes such as `summary-modal-backdrop`, `summary-modal`, `summary-modal-header`, etc., must exist to ensure proper layout.
- **Prop usage**: All props are required by the interface; callers must provide them to avoid TypeScript errors.
- **Testing**: Unit tests should cover the loading, error, and summary rendering paths, and confirm that clicking the close button triggers `onClose`.
